PROJECTS

Blog Application [Live Demo](#)

React.js | REST API

Developed a responsive blog application using React.js with reusable components and React Router.

Integrated REST API data to dynamically render blog content.

Implemented responsive layouts for desktop and mobile screens.

Shoe Mart [Live Demo](#)

React.js | Responsive UI | Product Cards

Developed a responsive shoe-shopping interface in React.js with reusable product cards and adaptable layouts for a consistent mobile-friendly browsing experience.

Hotel Booking System

Core Java | JDBC | MySQL

Developed a console-based hotel reservation system using Core Java, JDBC, and MySQL. Implemented customer management, room availability, booking workflows, and CRUD operations using OOP principles.

Ride-X - Bike Showroom Management System [Live Demo](#)

Spring Boot | React.js | MySQL | Razorpay

Developed a full-stack bike showroom application using Spring Boot, React.js, and MySQL with separate user and admin modules.

Implemented REST APIs for product inventory, cart, Wishlist, orders, coupons, and user management. Implemented JWT-based authentication and role-based access control for secure user/admin access.

Integrated Razor-pay payment processing and connected the React frontend with Spring Boot REST APIs.
